(call or text)

August 2024

Join us for two full days of Trials techniques at one of the most famous locations in the world, Turkey Rock Colorado. What better place to learn how to improve your skills! During this two-day weekend course, Ryan will explain, demonstrate, and coach each rider. Essential fundamental skills and the most advanced trials techniques are taught and have been used by riders in Observed Trials and Extreme Enduro to win championships! The training format is designed to help each rider develop a solid skill base and quickly advance in ability. Particular attention is paid to identifying and eliminating "bad habits" that stunt the growth of all riders at all levels. The weekend ends with everyone practicing their new skills in a minimum of one section with focused coaching from Ryan.
